Introduction to the Teacher

- **Options 6** is a course specially designed to introduce learners to the English language. The syllabus is based on graded structures and vocabulary, enabling students to use English effectively and ensuring that they enjoy themselves while learning. All four skills are developed (*listening, speaking, reading and writing*) through a variety of communicative tasks and key language is reinforced regularly. **Options 6** encourages *active, holistic* and *humanistic* learning and helps students develop a keen interest in the English language.
- **Options 6** comprises eight modules. Each module consists of four units. It is aimed at students who come under the category of A1.

Components

- **Student's Book**

The **Student's Book** has been specially designed to appeal to students and to involve them in language learning. New language is presented in context through lively dialogues and appealing texts. A variety of functional exercises, songs, poems and games help students practise the key language in a memorable and enjoyable way.

Options 6 is modularised; therefore, in each module the students are thoroughly exposed to the new language and achieve competency in the target language at a faster pace. Each module has its individual aims, and at the end of the module the students, with the help of their teacher, can record their progress in English. The teacher has the opportunity to recycle and further consolidate any language items upon completion of the *Self-Check* section. In addition, through the *Student's Self-Assessment Forms* (found in the *Teacher's Book*), the students can assess their progress and develop their language awareness and independence. (*See Instruments for Evaluation, p. 162.*)

Options 6 contains the following modules and their objectives:

Module 1: *school subjects, adjectives, countries and nationalities;*

Module 2: *appearance, personal things, activities;*

Module 3: *family, daily routines, jobs;*

Module 4: *rooms, furniture and appliances, places;*

Module 5: *(free-time) activities, celebrations, sports;*

Module 6: *food and drinks, containers and partitives;*

Module 7: *places, musical instruments, places of entertainment;*

Module 8: *activities, famous people, (character) adjectives.*

- **Key features of a module**

Dialogues

All the dialogues cover areas of interest within the students' knowledge. Students are given the opportunity to see their favourite characters come to life and practise the new language while following their adventures. Dialogues are a source of the key grammar and vocabulary thus providing valuable language input for the students.

Vocabulary

New language is introduced in a functional and meaningful context, and is practised through a variety of exercises such as picture-word association and completing set phrases in order to help students use everyday English correctly. In each lesson plan the teacher will find detailed guidance on how to vary the presentation of new vocabulary.

Grammar

The grammatical phenomena taught in each module are first presented in context, then highlighted and clarified by means of clear, concise grammar tables. Specific exercises and activities methodically reinforce students' understanding and mastery of each phenomenon. There is a Grammar Reference Section at the end of the *Student's Book* which includes the tenses presented in the course. The *Workbook and Grammar* contains a detailed explanation of each grammatical phenomenon.

Did you know?

The students are introduced to interesting facts aimed at stimulating their interest in the lesson in a fun and meaningful way.

Games, Chants & Songs

In every module there are songs, chants and games that add a creative and enjoyable element to the language classroom. Listening to songs/chants and playing games lower the students' affective filters and allow them to absorb language more easily.

Reading

Throughout each module there is a wide variety of reading texts such as emails, articles, poems, etc, which allow skills such as reading for gist and reading for specific information to be systematically practised. Reading for pleasure is fostered through *Enta the Dragon* episodes, which are designed to make reading an enjoyable and rewarding experience.

Development of listening skills

Students develop their listening skills through a variety of tasks which employ the vocabulary and grammar practised in the module in realistic contexts. This reinforces students' understanding of the language taught in the module.

Speaking

Controlled speaking activities have been carefully designed to allow students guided practice before leading them to less structured speaking activities.

Everyday English

Functional dialogues set in everyday contexts familiarise students with natural language. The dialogues also present useful expressions so that students can practise everyday English.

Pronunciation

Pronunciation activities help students to recognise the various sounds of the English language, distinguish between them and reproduce them correctly.

Development of writing skills

Students develop their writing skills through the use of all four language skills. Guided practice of the relevant vocabulary is given and consolidated and followed by a model text which is thoroughly analysed. Plans are also provided to guide students. There are writing activities throughout the modules, based on realistic types and styles of writing, such as invitations, emails and articles. These progress from short sentences to paragraphs and finally to full texts, allowing students to gradually build up their writing skills.

Enta the Dragon

After every odd module (1, 3, 5, 7) there is an episode of *Enta the Dragon*, promoting reading for pleasure. *Enta the Dragon* is a series of episodes in a cartoon story aimed at providing real language input and reading for pleasure.

Fun Time

This section reviews the module in a fun way and includes interesting facts and/or a variety of activities that revise information presented in the module. It also has a song that is connected to the themes of the modules as well as a related task.

Myths and Legends

This section, which appears after every even module (2, 4, 6, 8) is designed to introduce students to reading for pleasure. In this interesting and informative section, students read about myths and legends from around the world. This section also contains related tasks and creative projects, such as collecting information and presenting it to the class, which give students the chance to process the information they have learnt and compare it to the culture of their own country.

Across Cultures

After every two modules, the students have the opportunity to read short texts about aspects of life in other countries. In these interesting and informative pages, students are provided with cross-cultural information and read about aspects of various countries which are thematically linked to the module.

CLIL TIME

In the *CLIL TIME* sections, the students are exposed to other fields of study (e.g. Maths, History, etc) through English. In this section, the students learn how to use English as a vehicle to explore other subject matter. This reinforces their language learning and promotes learner independence and peer cooperation.

Go Green

In the *Go Green* sections the students are given the opportunity to learn about the environment and become more aware of various environmental issues in a fun and creative way. It also promotes an affinity with nature and makes the students more aware of the world we live in.

Self-Check

The *Self-Check* sections appear at the end of each module and reinforce the students' understanding of the topics, vocabulary and structures that have been presented in each module. A marking scheme allows students to evaluate their own progress and identify their strengths and weaknesses.

All About Russia!

This section gives students the opportunity to use English to talk about their own culture.

Songs in the Language Classroom

Songs are of great value in language learning. They are vivid examples of how the language taught is used in a real context and highlight both pronunciation and intonation. Furthermore, the rhyme and rhythm of songs enable the students to remember the newly acquired language, and stimulate learning.

Here are some ways to exploit songs:

- a **Pre-listening activity:** Choose about ten words from the song and write them on the board. Then, write another five words which are not in the song. The students copy all the words in their notebooks. Play the song twice. The first time, ask the students to circle the words they hear. When they hear the song a second time, ask them to put the words in the correct order. Elicit/Explain any unknown words. Finally, in groups or pairs, the students choose five words and write true sentences about themselves.
- b **Cloze exercises:** Photocopy the song and tippex out some key words (e.g. contrasting adjectives, etc). Hand out the photocopies. The students listen to the song and fill in the missing words. Allow the students to decide on the meaning of the words without explaining any unknown words first. Play the song (a few times, if necessary) and the students check their answers in groups or pairs. Finally, go over the answers with them, making sure they have understood the meaning of all the words.

These are just a few suggestions on how to use the songs in the language classroom.

- **Workbook and Grammar**

The **Workbook and Grammar** is in full-colour and consists of eight modules of ten pages each. The **Workbook and Grammar** can be used either in class or for homework, upon completion of each corresponding unit in the *Student's Book*. It aims to consolidate the language that appears in the *Student's Book* through various exercises incorporating all four skills.

The **Workbook and Grammar** also includes:

- I **Modular Revision**

This section revises the new language of each module and prepares students for the corresponding test.

Do a quick revision before the students complete the tasks. While you are going through the examples in each category, you can elicit meanings of words, sentences with the target structures, etc. Go through each exercise and explain to the students what they have to do. Then, students can:

- a do the exercises as written homework.
- b do some exercises in class and the rest as written homework.
- c do all the exercises in class.

The important thing is to have the students work on their own so that they are able to assess their progress thus far. In this way, the teacher facilitates the students' autonomy.

The students then fill in the corresponding *Student's Self-Assessment Form* and file it in their *Language Portfolios*. (See *Instruments for Evaluation*, p. 162.)

- II **Further Vocabulary Practice / Further Grammar Practice**

These sections exploit the vocabulary and the grammar presented in the *Student's Book*. They contain exercises that revise the vocabulary and grammar presented in each module.

- III **Presentation Skills**

This section helps learners develop their public speaking skills. Public speaking is more than just a talent. It is a skill that can be learnt and improved upon. This section ensures that students become memorable speakers. It contains age-appropriate models and effective techniques to help students develop and organise their presentations as well as useful tips to support and guide them.

- IV **Language Review**

The section provides students with further vocabulary and language practice for each module.

- **My Language Portfolio**

My Language Portfolio is used to contain material that the students will use, along with any extra material given by the teacher throughout the course. *My Language Portfolio* has been designed to stimulate and support the learning of the English language. Its purpose is to help the students reflect on, realise their progress in, and improve their language learning.

The *Language Portfolio* is the students' property. It is a tool to accompany the students' language learning

throughout their school life and is suitable for documenting their learning both inside and outside the classroom.

In practice, *Language Portfolios* may include projects or other examples of written work, memory sticks (with work or drawings completed inside or outside the classroom), DVDs (with the students' favourite story or with song performances, school plays, etc), certificates, reports from teachers, or even a collection of objects or pictures. It is a collection of material that the learners can keep as evidence of their learning. As a result, while compiling their *Language Portfolios*, students learn how to work independently.

How to make a Language Portfolio

During the first lesson, explain to the students that they should bring in a dossier, which they will have with them at all times and in which they will keep their *Language Portfolios*. For the next lesson, bring in self-adhesive labels, write *My Language Portfolio* on them and help your learners stick them onto their dossiers. Demonstrate how to store their material in their *Language Portfolios* and make sure they update it regularly.

- **Teacher's Book**

The **Teacher's Book** provides step-by-step lesson plans as well as the answers to the exercises in the *Student's Book* and the *Workbook and Grammar*. It also contains extra ideas on how to present new words and language patterns, additional activities and games, as well as audioscripts for the listening activities. Each module begins by setting out the targets and objectives of each unit in a clear and concise way. At the beginning of the *Teacher's Book* the teacher can find the *Programme*, an analytical chart of the targets and objectives of the modules.

The **Teacher's Book** also includes:

Presentation Skills Guidelines

This section includes **Student Guidelines** and **Teacher Guidelines**. The **Student Guidelines for Presentation Skills** include notes on different types of presentations, how a presentation is structured, as well as various techniques and tips. The **Teacher Guidelines for Presentation Skills** include step-by-step instructions on how to help students with their presentations. The teacher can photocopy the **Student Guidelines for Presentation Skills** for each student. (See pp. 143-146.)

Dictation

Dictation is an effective element of English language learning. It consolidates the key vocabulary and helps students to practise their listening and writing skills. (See pp. 157-159.)

Steps for using dictation:

- 1 Photocopy and hand out the corresponding dictation sheet.
- 2 Elicit guesses to the missing word(s) from the students. Give hints if necessary.
- 3 Play the recording, twice if necessary.
- 4 The students listen and complete the missing information.
- 5 Check the students' answers.

Instruments for Evaluation

- Evaluation is an essential part of the learning process. It helps the learners become aware of their progress in the target language, how much they have achieved and what areas need further practice. Evaluation also allows teachers to reflect on the validity of their teaching practices and the types of the material being used.

In the **Instruments for Evaluation**, the teacher can find:

- *Formative Evaluation Chart*: The teacher uses the chart to evaluate the students on an activity at any time during the course and writes the marks obtained with the help of a code. (See p. 163.)
- *Student's Self-Assessment Forms*: The students give their personal opinion about their own results upon completion of each *Self-Check* section. They file these forms in their *Language Portfolios*. (See pp. 164-167.)
- *Progress Report Cards*: The teacher completes them, one per student, upon completion of **each module**, taking into consideration the student's performance and progress throughout the module, as well as the mark received in the corresponding *Module Test*. The students file their *Progress Report Cards* in their *Language Portfolios*. (See pp. 168-171.)

- **Teacher's Resource Pack and Tests**

The **Teacher's Resource Pack and Tests** provides the teacher with additional material which may be used in the classroom for further exploitation of the language learnt.

Options 6 Teacher's Resource Pack and Tests is divided into the following sections:

I Reinforcement Activities

These activities are in the form of projects which students can do on their own or in groups. The students can then file their projects in their *Language Portfolios*. They also include pairwork activities as well as games.

II Module Tests

There are eight tests, one for each module, as well as a *Mid Test* and an *Exit Test*. The *Mid Test* monitors the students' progress up to module 4 and the *Exit Test* can be used as a placement test for the next level.

- **Class CDs**

The **Class CDs** contain all the recorded material which accompanies the course.

- **Test Booklet CD-ROM**

The **Test Booklet CD-ROM** contains the tests in the *Teacher's Resource Pack* in Word format, as well as all recorded material and audioscripts that accompany the tests.

- **Interactive Whiteboard Software**

The **Interactive Whiteboard** integrates all the elements of the course in a much more engaging and entertaining way to facilitate learning.

- **ieBook**

The **ieBook** acts as a personal study aid to be used at home. It helps the students with their assigned homework, dictation, vocabulary, reading and revision in a fun and interesting way. With the **ieBook**, students enjoy learning English with games, videos, quizzes and stories.

Characters

Options follows the adventures of a group of loveable and exciting characters. The students have the opportunity to find themselves in a new world, where they meet a group of friends: *Harry*, *Mona*, *Emma* and *Lee*, whose characters have been carefully selected to reflect the ethnic diversity of our societies. These four friends, along with their virtual reality friend, *ELF* (Electronic Life Force), explore the world around them, and the students follow them in their exciting adventures. All the characters possess super powers. They open the door to the characters', as well as the students',

imagination, while *ELF* adds an adventurous element to the story by being wise but fun. The students' imagination is also catered for by the cartoon characters *Enta* and *Basher*, two dragons, and a Kung Fu master (*Chopsticks*)!

Basic Principles of Options

The modularised approach of the **Options** series caters for the holistic development of students. It enables students to work on a theme from different angles and employ different learning styles. Students are asked to engage in a variety of activities, including listening, role-play, matching, selecting, giving personal information and opinions, etc. Accordingly, the language learning process involves the students' mind, emotions and spirit.

The activities are also aimed at meeting the needs of all types of learners (visual, auditory, tactile/kinaesthetic) and aim to develop the students' *linguistic*, *learning-to-learn* and *social skills*.

- **Linguistic Skills**

The students can do the following upon completion of each module:

- 1 associate pictures with new vocabulary with the aid of illustrations in their books;
- 2 produce the sounds, pronunciation and intonation of the target language;
- 3 communicate with their peers in English, exchanging information about everyday matters, such as describing people, giving advice, etc;
- 4 comprehend dialogues, short exchanges, etc and use the set patterns in multi-sensory tasks; and
- 5 achieve oral competency through the reproduction of short exchanges and dialogues.

- **Learning-to-learn skills**

Upon completion of each module, the students will be able to:

- 1 concentrate better and longer, as they are trained to listen to dialogues in order to perform a task;
- 2 skim and scan texts and dialogues to locate the necessary information;
- 3 develop their writing skills;
- 4 understand aspects of life in other countries; and
- 5 record and assess their progress through the *Self-Check* section and *Student's Self-Assessment Forms*, thus developing autonomy.

- **Social Skills**

Upon completion of each module, the students will:

- 1 experience being part of a group;
- 2 become more responsible by keeping and updating their *Language Portfolios*;
- 3 have a good understanding of the culture and traditions of other countries;
- 4 have some understanding of the way of life in other countries; and
- 5 be motivated to read English, encouraged by the enjoyable adventures of *Enta the Dragon*, which appear in every odd module (1, 3, 5, 7).

Checking Students' Progress

- a **Homework:** At the end of each unit, the students should be given some homework. The *Teacher's Book* provides some suggestions on what to assign for homework and how to check it in the next lesson.
- b **Progress Report Cards:** After completing each module and taking the corresponding test, photocopy the respective *Progress Report Card* from the *Teacher's Book* and fill it in, one per student. The students are to keep these cards in their *Language Portfolios* for future reference.
- c **Student's Self-Assessment Forms:** After the students have completed the *Self-Check* section of each module, they are to fill out the *Self-Assessment Form* by themselves. This learning-to-learn technique enables the students to develop awareness of their progress. The *Self-Assessment Forms* should be kept in their *Language Portfolios* for future reference. The *Student's Self-Assessment Forms* can also be found in the *Teacher's Book*.

Types of learning styles

Over the years, teachers have noticed that some of their students learn by listening to new information, some students prefer to read about it, while others need to do something with the new information. There are many different learning styles. Consequently, a coursebook should offer a variety of exercises and material to stimulate all learning styles and help students learn in the way that suits them best.

- **What are the types of learning styles?**

- **Visual Learners**

These learners need to see the teacher's body language and facial expressions to fully understand the content of the lesson. They think in pictures and

learn best from visual displays, including: diagrams, illustrations, transparencies, videos, flashcards and hand-outs.

- **Auditory Learners**

These learners learn best through verbal lectures, discussions, talking things through and listening to what others have to say. Written information may have little meaning until it is heard. They often benefit from reading a text aloud and recording themselves.

- **Tactile/Kinaesthetic Learners**

Tactile/Kinaesthetic learners learn best through a hands-on approach, actively exploring the physical world around them. They may find it hard to sit still for long periods and may become distracted by their need for activity and exploration. These learners express themselves through movement. They have a good sense of balance and hand-eye coordination. By interacting with the space around them, they are able to remember and process information. They have to do things on their own to be able to learn the new language.

Suggested Teaching Techniques

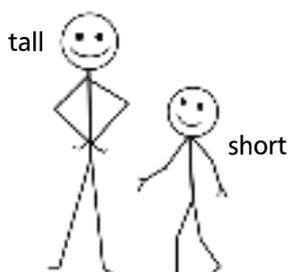

Much of the new vocabulary in **Options 6** is presented through pictures, and students are asked to match the pictures to listed words. Vocabulary is always presented in context, and emphasis is placed on collocations and word association, since memorising new words is easier when they are presented in lexical sets.

Further techniques that you may use to introduce new vocabulary include:

- **Miming.** Mime the word to be introduced. For instance, to present *sing*, pretend you are singing and ask students to guess the meaning of the word.
- **Synonyms, opposites, paraphrasing and giving definitions.** Examples:
Present *outgoing* by giving a synonym: *Someone who is sociable is very outgoing.*
Present *tall* by giving its opposite: *He isn't short, he's tall.*
Present *weekend* by paraphrasing it: *I don't work at the weekend. I don't work on Saturday and Sunday.*
Present *hang out* by giving a definition: *When you hang out with friends, you spend time with them.*
- **Context.** Place vocabulary items in context with examples which make understanding easier and more complete. For instance, introduce the words *career* and *job* with the following example: *Dan has a successful career in teaching. (i.e. the job that somebody does for a*

long time). Many people lost their jobs last year. (i.e. the work somebody does to make money.)

- **Visual prompts.** Show photographs or drawings to make understanding easier.
- **Use of (bilingual/monolingual) dictionary.** Encourage students to guess the meaning of a word, then use their dictionaries to check if their guess is correct.
- **Sketching.** Draw a simple sketch on the board to illustrate the word(s) to be explained. For instance:

- **Flashcards.** Make flashcards out of magazine or newspaper pictures, photographs, ready drawings and any other visual material which may serve as vocabulary teaching tools.
- **Use of L1.** In a monolingual class, vocabulary can be explained in the students' mother tongue, although this method should be used only in moderation. Students also need to compare their mother tongue to the English language to find similarities and/or differences.

The choice of technique depends on the type of word or expression. For example, it may be easier to describe an action verb through miming, and not through a synonym or definition.

ABBREVIATIONS

The following abbreviations are used in the *Student's Book* and *Teacher's Notes*:

T	teacher	sb	somebody
S(s)	student(s)	sth	something
HW	homework	n	noun
L1	students' mother tongue	v	verb
Ex.	exercise	adj	adjective
p(p).	page(s)	adv	adverb
e.g.	for example	phr	phrase
i.e.	that is	phr v	phrasal verb
etc	et cetera		

Note: *Check these words* sections can be treated as follows: Go through the list of words before the students read the text and present the new words by giving examples, synonyms/opposites or miming their meanings. Alternatively, go through the list of words after the students have read the text and ask them to explain the words using the context they appear in. The students can give examples, mime/draw the meanings or look up the meanings in their dictionaries.

Hi Becky!

I'm writing to tell you all about Treasure Island in Wales. I was there with my sister yesterday. It's fantastic and there's so much to see and do! I really loved the rides. My favourite one was Tsunami! We also watched a show with some professional surfers and that was amazing, too. They were really cool! Then, we watched the parade with lots of pirate characters such as Jack Sparrow, Blackbeard and

Captain Hook. It was a great day! I'm sending you some photos!
Talk soon.

So what did the Romans do in their free time? Well, first of all, the Romans had different free time activities. One popular activity was playing different kinds of board games. Yes, that's right. Romans played board games. Hunting was also very popular with the Romans. They hunted not only for food, they also hunted for fun! Another popular activity was going to the baths. The Romans spent a lot of time at the baths. They loved the baths and they didn't use them just to get clean! People went there to keep fit, relax and meet with their friends. Everyone could go to the baths. They were open to everyone! Today, you can see Roman baths right here in Britain, in the city of Bath, of course!

Presentation Skills

Teacher Guidelines

Teaching students how to prepare a presentation is a lot like teaching them how to write a composition. Here are the steps you can follow:

Step 1

Decide on the presentation topic. Remember to take into account the situation and the target audience. It is also important to decide on the type and purpose of the presentation, as this will determine the style and the language used.

Step 2

Divide the class into work groups, so that they can collaborate and give each other feedback as they create the presentation. You can help them decide which role each student will take: for instance, who will do the research? Who will write the presentation? Who will look for visuals, quotations, etc?

Step 3

Tell the students to read the texts assigned or brainstorm for ideas, and make notes in their notebooks.

Step 4

Remind your students about the importance of a well-organised presentation, which consists of an introduction, main body and conclusion. At this point, students should start organising their notes into spidergrams or diagrams.

Step 5

Have the students start working on the content of the presentation (expanding their spidergrams into paragraphs/diagrams), using appropriate opening, closing and feedback (if applicable) techniques and including visuals, music, quotations, etc.

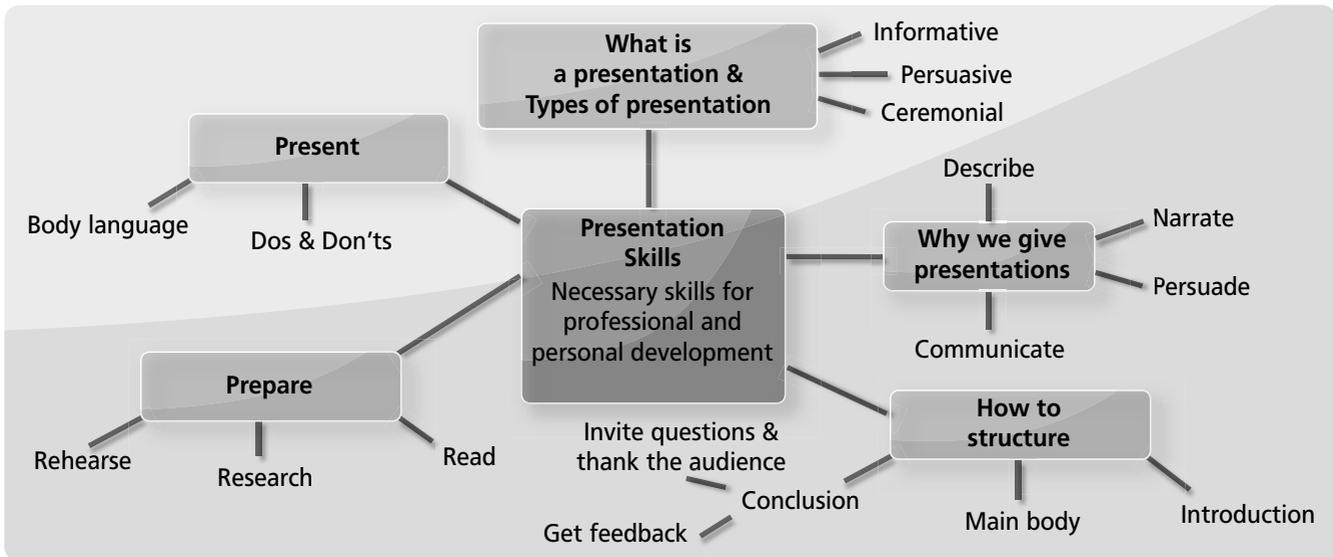

Step 6

Ask students to write their presentation script and submit it to you for feedback. Check for language (correct use of grammar and lexis), clear organisation of ideas, appropriacy, style and flow.

Step 7

Encourage students to use presentation software (such as PowerPoint® or Keynote®), if they wish to support and highlight their points and make their whole presentation more lively.

Student Guidelines (You can photocopy the following pages and give them to the Ss.)

What is a presentation?

Presentations describe, narrate, persuade or communicate ideas. Presentation skills are necessary for personal and professional development.

Types of presentations

There are different types of presentations:

- **Informative** e.g. school presentations, technology & science conferences, business seminars etc.
- **Persuasive** e.g. in sales, debates, to a group of peers, politicians' speeches etc.
- **Ceremonial** e.g. graduation, wedding toast etc.

Presentation skills are also needed in **interviews** (job & TV), **project reports** at a meeting, **social events**, **toasts** at an event with family or friends, colleagues etc.

Why we give presentations

We give presentations to:

- A describe** a product, an invention, a place, people (e.g. myself, a famous person) etc.
- B narrate** an experience, a story, a myth, a fable, an event (e.g. natural disaster) etc.
- C persuade** by presenting arguments for & against an issue, expressing our opinion on an issue, stating a problem & suggesting solutions, political discussions, campaigns etc.
- D communicate** in panels, debates, conferences etc.

How to structure a presentation

A presentation consists of a(n):

- **Introduction** in which we greet the audience, present ourselves and present the topic.
- **Main body** in which we present the main points.
- **Conclusion** in which we **summarise** the main points, **invite questions** from the audience and **thank** the audience for listening to us. We can sometimes **get feedback** from the audience.

Opening/Closing techniques

To **start** a presentation we can:

- 1 **address the audience** by asking a question e.g. *Who is your favourite superhero?*
- 2 **use a quotation** e.g. *There is a saying, "A book is a gift you can open again and again," and the same is true about stories.*
- 3 **ask a rhetorical question** e.g. *It's true that travelling broadens the mind, isn't it? Well, when I travelled to Kenya, I certainly learned a lot.*
- 4 **make a statement** e.g. *You can find out a lot about a country by learning about its national animal.*
- 5 **narrate a personal or general story** e.g. *The Incas lived in South America hundreds of years ago. They didn't know how to write and they didn't know about the wheel, but they had a great empire. They built some of the most amazing buildings in the world and their cities were truly beautiful.*
- 6 **set the scene and stimulate emotions** e.g. *Imagine you are on your way to school. It's cold and dark and there is snow on the ground. There's no one around and it's very, very quiet.*
- 7 **use visuals (photos, charts, films, pictures etc)** e.g. *Look at this photo of ...*
- 8 **use music (a song, soundtrack etc)** e.g. *Listen to this song. What comes to mind when you hear it?*
- 9 **use humour (a joke, a riddle etc)** e.g. *I've got colourful feathers and black eyes, I can whistle and talk and I can fly. What am I?*
- 10 **use a rhyme** e.g. *When I'm alone and feeling sad, my pet is the one who makes me feel glad.*

To end a presentation we can:

- 1 **address the audience by asking a question** e.g. *If you were in Valencia for the fire festival, what would you like to do?*
- 2 **use a quotation** e.g. *In the words of Nelson Mandela, "Learning is the most powerful thing we can use to change the world."*
- 3 **ask a rhetorical question** e.g. *After all, you learn something new every day, don't you?*
- 4 **make a statement** e.g. *Without Dian Fossey, there probably wouldn't be any mountain gorillas left in Rwanda.*
- 5 **narrate a personal or general story** e.g. *I remember the day I met my best friend. We liked each other right away. Now we do everything together and I can't imagine my life without him.*
- 6 **stimulate emotions** e.g. *Imagine how Florence Nightingale felt when she arrived in Turkey. She was alone, nervous and maybe even frightened, but she knew she wanted to help save the lives of the British soldiers. Thanks to her ideas, many of them survived.*
- 7 **use humour (a joke, a riddle etc)** e.g. *What is the tallest building in the world? The library, because it has got the most stories!*
- 8 **ask a "what if" question** e.g. *What if you could be a superhero for a day? Which one would you be?*
- 9 **use a rhyme** e.g. *As the song goes: Festival time is for family and friends; we dance all night – the fun never ends!*

Ways to get feedback from the audience (optional)

After you have presented your points you can check if your audience have understood your topic. There are several ways to get feedback and check understanding. These are:

- 1 **Pop quiz style questions in teams:** Split the audience into two teams (A and B) and ask questions about the presentation topic. e.g. *Now let's have a quiz in teams! The team that gets the most answers correct wins! Team A: Where was ... born? ... That's right! Team B: What is ... famous for? ...*
- 2 **Open discussion:** Invite the audience to share their own similar experiences e.g. *Now I'd like to hear about your.../Would anyone like to share his/her own similar experience?*
- 3 **Polling questions:** Ask the audience a question. The audience can answer by raising their hands or standing up e.g. *How many of you walk to school in the morning? Raise your hands.*
- 4 **Focus groups:** Divide the audience into groups of 3-4 people and give questions for them to discuss and report back to the audience e.g. *Discuss which festival you would like to go to and why.*
- 5 **Game:** Prepare a Y/N or T/F quiz with questions/statements based on the presentation e.g. *School starts at 9:00 am in Colombia. If the answer is YES/TRUE, the participants stand up, if the answer is NO/FALSE, they remain seated.*

- 6 **Make a list:** Summarise the most important points of your presentation. Write the initial letter of each word/phrase on a PP slide/a flipchart/the whiteboard. Ask the audience to find the correct word. (e.g. *What can we do to protect the environment? Recycle/Reuse/Save water/Plant trees/Ride a bike to school.*)

Hello. My name is Megan Jacobs. There is an American saying that goes, "It's a good thing to be rich and a good thing to be strong, but it is a better thing to have many friends." School is a great place to meet new people and make new friends. Harry, Emma, Mona, Lee and I are new to this school, but we hope we can become your friends.

Harry Taylor is noisy and funny. His favourite colour is green. His lucky number is thirteen and his favourite football team is Manchester United.

Emma Richards is polite and trendy. Her favourite subjects are IT and English. Her favourite colour is yellow and her lucky number is eleven.

Mona James is friendly and sweet. Her favourite subjects are Art and Music. Her favourite day is Saturday and her favourite animal is her dog, Missy.

Lee Chan is hard-working and clever. His favourite subjects are Music and IT. His favourite football team is Arsenal and his favourite colour is red.

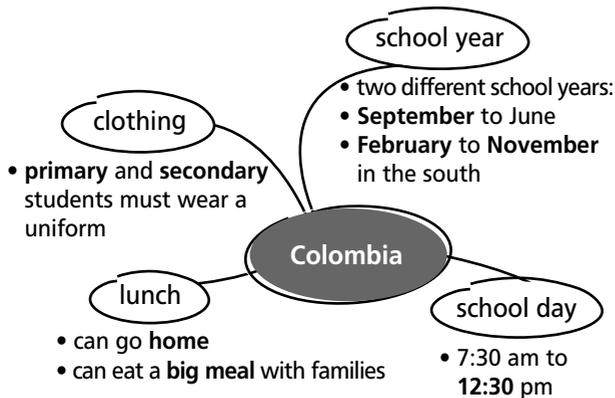

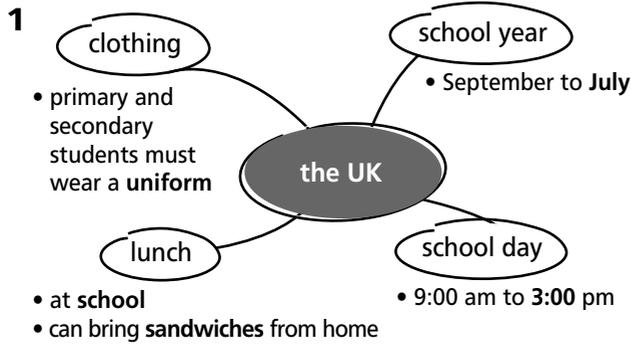

This is a photo of me. I am clever and polite. My favourite colour is purple. My favourite subjects are Art and History. My favourite day is Sunday and my lucky number is eight. My favourite animal is my rabbit, Peter.

To sum up, Harry, Emma, Mona, Lee and I don't have the same favourite school subjects, colours or football teams. But we can still be great friends! After all, it's these differences that make us who we are, isn't it?

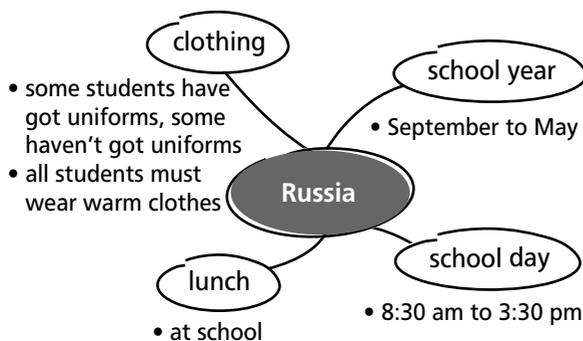

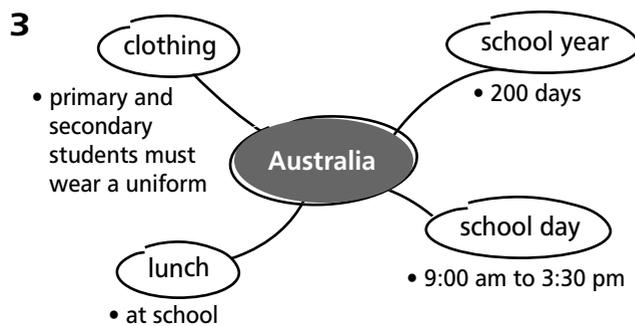

Now let's play a game. Listen to my statements. If you think a statement is true, stand up. If you think a statement is false, remain seated. Let's begin! Harry's favourite football team is Arsenal. ... No, it's not. Lee's favourite team is Arsenal. Emma's favourite colour is yellow. ... Yes, that's right! Mona's favourite animal is her dog. ... Yes, that's correct! My lucky number is eleven. ... No, it's not. It's eight. Well done!

Has anyone got any questions? ... Thank you for your attention.

Hello. My name is Julian Thomas. Where do students have their summer holidays in December and January? In Australia! In Russia, school summer holidays are in June, July and August, but not everything is so different in Australian and Russian schools. In fact, many things are the same.

In Australia, there are 200 days in the school year. The school day is from 9:00 am to 3:30 pm. The students can eat lunch at school. Primary and secondary students must wear a uniform.

In Russia, the school year is from September to May. The school day is from 8:30 am to 3:30 pm. The students can eat lunch at school. Some students have got uniforms and some haven't got uniforms, but they must all wear warm clothes.

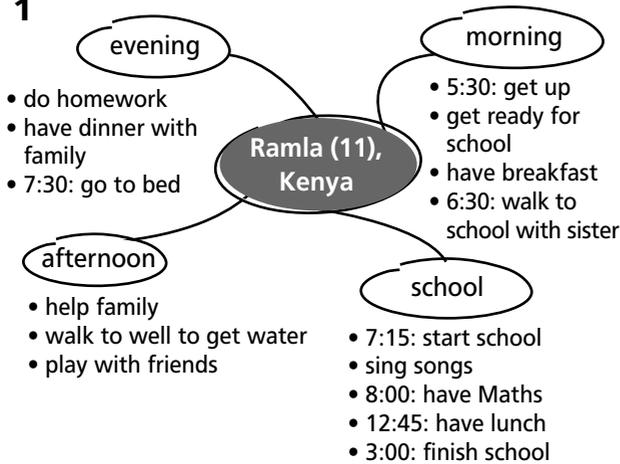

All in all, students in Australia and Russia live on opposite sides of the world, but their schools aren't very different. In Russia and Australia, the school day is almost the same. Wherever we go to school, we're lucky that we can learn. As the poem goes:
*Have you got your paper, pens and glue?
 We've got a lot of learning to do!
 Come along because school is fun;
 Learning is good for everyone!*

Now it's your turn! How many of you want to wear a school uniform like students in Australia? ... Not many! How many of you want to eat your lunch at school like students in Russia? ... Everyone! Great!

Are there any questions? ... Thank you for listening.

Good afternoon. I'm Martin Wilkinson. What is a typical day like for you? What time do you get up? Do you eat breakfast at home or at school? We live in the same town, so your typical weekday is probably a lot like mine, but for my friend Felipe things are a bit different. Felipe is 10 years old and he lives in Brazil. Now, thanks to the exchange trip, I can tell you all about his day.

In the morning, Felipe gets up at 6:30. He gets dressed and then he walks to school with his brothers. At school, Felipe has breakfast. At 7:10 his lessons start. At 10:00 he has lunch. He finishes school at 12:00. In the afternoon, Felipe helps his family and washes the dishes. Then he meets his friends and plays football. At 3:00, he has a shower and then he does his homework. In the evening, Felipe watches TV and at 9:00 he has dinner with his family. Then he goes to bed.

In the morning, I get up at 7:30 and have breakfast. Then I catch the bus to school with my friends. At school, I have an assembly at the beginning of the day. School starts at 9:00 and at 12:30 we have lunch. School finishes at 3:00. In the afternoon, I have guitar lessons or football practice and then I do my homework. In the evening, I help my mum cook dinner and then we eat with my dad and little brother. I watch TV, surf the Net or play with my brother after dinner. I go to bed at 10:00.

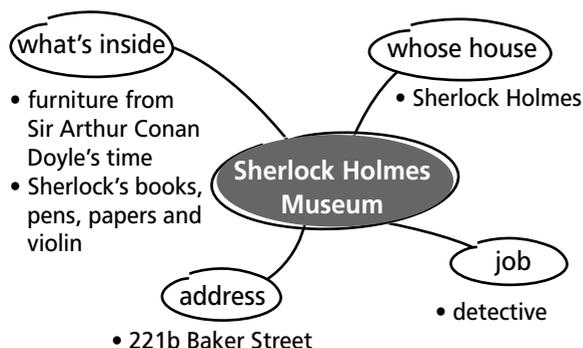

In conclusion, my day and Felipe's are very different. We both do our homework in the afternoon, but I finish school at 3:00 and Felipe finishes school at 12:00. I'm so happy because now I know what life is like for children in Brazil. After all, you can't really understand another person until you live their life, can you?

Now let's do a quiz in teams! The team that gets the most correct answers wins! Team A: Where does Felipe eat his breakfast? ... At school. That's right! Team B: What time do I finish school? ... At 3:00. Well done! Team A: What time does Felipe have his dinner? ... At 9:00. That's correct! Team B: Who do I eat my dinner with? ... My mum, dad and little brother. Right! It's a draw!

Are there any questions? ... Thank you for listening to my presentation.

Good morning, ladies and gentlemen. My name is Lauren Black and I'm your tour guide today. There are a lot of things you can learn about a person from their home. In the words of Roman writer Pliny the Elder, "Home is where the heart is." Today we can visit the home of the famous scientist Albert Einstein and learn more about him.

This building is the old home of Albert Einstein, his wife Mileva and their son Hans Albert. Albert Einstein is one of the most famous scientists of all time. His house is on the 2nd floor of 49 Kramgasse Street, right here in Bern, Switzerland. Inside we can see information about

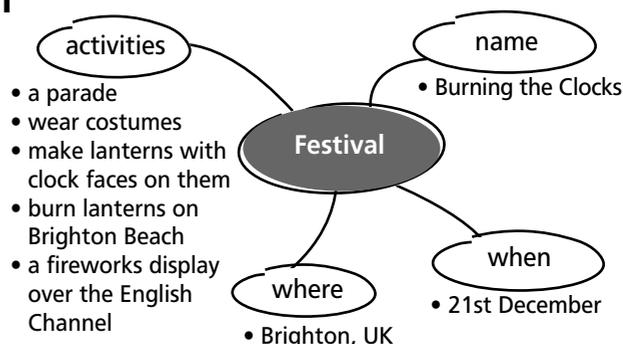

Einstein's life and work, copies of his writings and pictures and furniture from the time period.

Overall, Einstein's flat is a great place to visit. When you look at his home, the old furniture and the copies of his work, you begin to understand the life of the great scientist. In the end, our homes are part of who we are, aren't they?

Are there any questions before we go inside? ... OK! This way, please.

Welcome to the programme. I'm Luc Arnaud and you're watching *Festival Time*. Imagine you are on holiday in Spain. It's a warm spring night and the streets are full of people. There are colourful lights on the buildings and music is playing. Suddenly you see a huge fire in front of you! But don't panic – it's all part of the celebrations for Las Fallas! Las Fallas is our first stop on today's show, then we're visiting a festival in my country.

Las Fallas means 'the fires'. It takes place from 13th to 19th March every year in Valencia, Spain. Before the festival, people make *niñots*, which are giant puppets. During the festival, there are parades and paella contests. On the last day, people put fireworks inside the *niñots* and set them on fire! It's bright, loud and a lot of fun! Now let's travel to France to see the Nice Carnival.

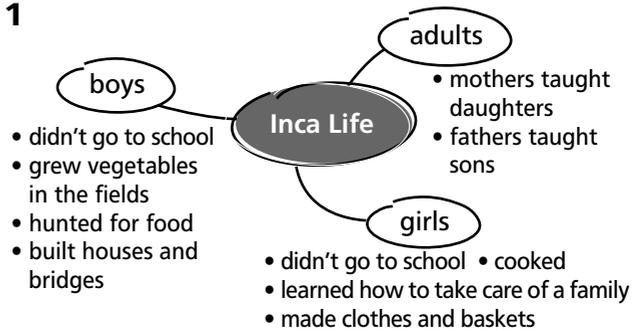

The Nice Carnival takes place in the city of Nice every February, and it lasts for 15 days. At the festival you can watch parades with giant puppets, like the *niñots* of Las Fallas, and see dancers and musicians from around the world. There is also a famous parade called the *Bataille de Fleurs*, or the 'Battle of Flowers', where people in the parade throw about 100,000 flowers into the crowd!

To sum up, Las Fallas, a fire festival in Spain, and the Nice Carnival, a festival in France, are different, but both of them bring families and friends together to celebrate and have fun. Festivals are a great way to learn about a country and the people that live there. As Andrew Zimmern says, "Be a traveller, not a tourist. Try new things, meet new people, and look beyond what's right in front of you. Those are the keys to understanding this amazing world we live in."

Thanks for tuning in. See you again at the same time next week!

Good afternoon, everyone! My name is Patrick Jones. Look at these pictures. They show the Parthenon in Athens and the Great Pyramid at Giza. Buildings like these are all that's left of the great empires of ancient Greece and Egypt, but we know quite a lot about life in those days.

In ancient Greece, men fought in the armies and played sports. Women looked after children and taught their daughters. Girls didn't go to school. They learned how to look after their families and they cooked and cleaned. Only boys went to school. They learned reading, writing, arithmetic, music and poetry and they wrote on wooden tablets. They also did athletics where they ran, jumped, wrestled and practised throwing spears and a discus. The place they trained was called the *gymnasium*.

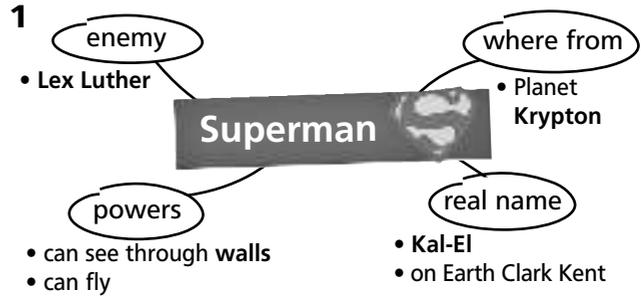

In ancient Egypt, adults caught fish with nets and spears in the River Nile. They also caught birds with nets. They carried goods by boat on the Nile and they made paper from papyrus. Girls didn't go to school. They learned how to take care of the animals and grow food. They also made clothes. Only rich boys went to school. They learned to read, write and do arithmetic.

In summary, life in ancient Greece and Egypt was different from life today. Many children didn't go to school and everybody worked very hard because there were no machines to help them cook, clean and make things. Even though life was difficult for people in ancient Greece and Egypt, there is still a lot we can learn from them. Writer Richelle Mead said, "History is important because it tells us about the past. And by learning about the past, you can understand the present."

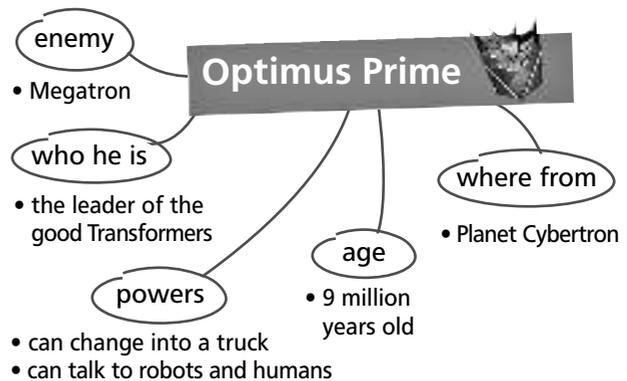

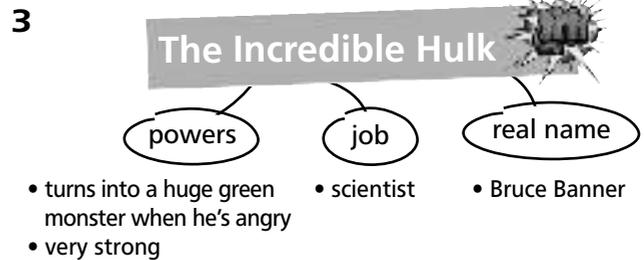

Now let's play a game to see what you can remember. Listen to my statements. If you think a statement is true, stand up. If you think a statement is false, remain seated. Let's begin! In ancient Egypt, boys and girls went to school. ... No, only rich boys went to school. In ancient Greece, boys learned poetry in the *gymnasium*. ... No, they did athletics in the *gymnasium*. The ancient Egyptians made paper from papyrus. ... Yes, that's right! In ancient Greek schools, the boys wrote on wooden tablets. ... Yes, they did! Well done!

Hello. My name is Edward Johnson. Imagine you are in danger and you need help. Suddenly, a huge robot and a green giant appear to save you. It's Optimus Prime and the Incredible Hulk!

This is the Incredible Hulk. His real name is Bruce Banner. He is a scientist. When he's angry, he turns into a huge green monster. He is very strong.

This is Optimus Prime. He is from Planet Cybertron and he is 9 million years old. He can change into a truck and he can talk to robots and humans. He is the leader of the good Transformers. His enemy is Megatron.

To sum up, we all enjoy watching the adventures of Bruce Banner when he turns into the Incredible Hulk, and Optimus Prime when he saves planet Earth. They are brave and their lives are very exciting. Now, imagine you have the powers of the Incredible Hulk or Optimus Prime for a day. What would you do? Not an easy question to answer, is it?

5 (Ss should find pictures of Dian Fossey and/or mountain gorillas.)

6 Suggested Answer

Good morning. My name is Daniel Peterson. Imagine you're alone in the jungle. Suddenly, a huge gorilla appears. He's coming straight towards you, but you're not afraid. You know he doesn't want to hurt you. In fact, he's like part of your family. This was how Dian Fossey felt about the mountain gorillas of Rwanda.

Dian Fossey was a zoologist. She was born on 16th January 1932 in Fairfax, California. When she was young, Dian loved animals and wanted to be a vet. At first, she worked with sick children, but then she became interested in gorillas after reading about them.

Dian travelled to Africa and set up the Karisoke Research Centre in Rwanda. She spent 22 years

studying mountain gorillas. She fought against the hunters that wanted to kill gorillas.

Dian Fossey was killed by a hunter on 26th December 1985. She was 53 years old. I admire Dian Fossey because she was brave. She let the world know that mountain gorillas were in danger.

To conclude, Dian Fossey spent most of her life working in Africa to save the mountain gorillas, and in the end she died doing what was right. Dian knew how dangerous it was to try and save the gorillas. As she herself said, "The man who kills the animals today is the man who kills the people who get in his way tomorrow." But this didn't stop Dian from doing the right thing. She was brave in the face of danger and that's why she's my hero.

Thank you for your attention.

Evaluation is an essential part of the learning process. It helps the learners realise their progress in the target language, how much they have achieved and what areas need further practice. The learners' attitude towards their own learning experience is positively influenced as they participate in the whole process. Evaluation also allows teachers to reflect on the validity of their teaching practices and the types of materials being used.

The process is basically divided into three parts: *initial* evaluation at the beginning of the course, *formative* evaluation, which is done on a daily basis, and *cumulative* evaluation upon finishing a module.

Initial Evaluation

This evaluation mainly centres on the students' reports from the previous school year. The teacher can assess the students' level, work already covered, work needed to be covered, strengths, weaknesses, etc.

Formative Evaluation

Any exercise a student does can be used for this type of evaluation. The results are then recorded on the students' *Formative Evaluation Chart*.

Make as many photocopies as you need and complete the charts as indicated. Write the names of the activities you are going to evaluate (*e.g. the dialogues, songs, craft activities, and so on*) and write the marks obtained with the help of the following code:

c (competence): the student has a full understanding of the task and responds appropriately

w (working on): the student has an understanding of the task but the response is not fully accurate

n (non-competence): the student does not understand the task and is unable to respond appropriately

Cumulative Evaluation

In order to obtain reliable information, the cumulative evaluation takes into account the work the students have done throughout the module as well as their participation and attitude. The course is accompanied by two forms of cumulative evaluation:

- *Student's Self-Assessment Forms*
The students give their personal opinion about their own results upon completion of each *Modular Revision and Assessment* section. They file these forms in their *Language Portfolios*.
- *Progress Report Cards*
The teacher completes them, one per student, after each test and they are given to the students to file in their *Language Portfolios*.
